

# Swift Fox

## Become a Conservation Hero!

Swift Foxes were extinct in Canada from 1938-1988. The Calgary Zoo helps with the recovery of Swift foxes in Canada! Using the information below create a plan how you would save your favorite threatened animal. Share your plan with us!

## Understand Their Challenges

Do you know what challenges your animal is facing? Could it be their home is shrinking or being broken into smaller parts? Does garbage hurt them? Or their favorite food source has disappeared? Are there just not enough of them?

## Plan Your Solution

Decide on how you will solve the challenges they face. Be creative! How can you and others help? Include who should be involved, what might have to be built, where in the world you may need to travel, and if there are other animals involved in your project.

## How Will You Measure Success?

How are you going to know that your plan works? How will you be able to measure success? Conservation scientists love collecting data as they complete their research to make sure what they are doing is creating the results they want.
