

# Who's who at the zoo?

## An Array of Alpacas!

Share your favourite alpaca pictures and stories with us  
**#YYCZooSupportingYou**

### Latte

Latte is our eldest alpaca – She will turn 10 on July 15, 2020. She is beige in colour.

### Pekoe

Pekoe can be recognized by her dark brown hair. She was born five days after Chai, on August 11, 2012.

### Chai

Chai's hair is white. She is the alpaca that our keeper affectionately called our "in your face" alpaca on the Daily Dose – check out how she said hello to the camera and maybe you can guess why!

Can you tell the alpacas apart in this photo using the clues about each?

# Who's who at the zoo?

L-I-let's get something straight:  
our I-I-ladies are not llamas!

## Llamas

Llamas are bigger. They have coarser hair, as well as longer faces and ears.

## Alpacas

Alpacas are shorter, have softer hair and shorter faces with smaller, rounded ears.
