

# Giraffe Tower

A group of giraffes is called a **TOWER!**

Giraffes are the tallest mammal and our male giraffe, Nabo is 5.2 metres tall. That's 17 feet! That's like having 4 or 5 of your friends stand on your shoulders!

## YOUR MISSION

Using materials in your home (ask your adults for permission!), try to build a tower as tall as you can and see how it measures up to Nabo.

### PRO TIPS!

You might need to go outside for this.

Think about what will help support your tower as it grows.

Try Lego, bins, boxes, toilet paper/wrapping paper or paper towel rolls, cans, etc. (just make sure you recycle or reuse everything you can afterward!)

17 feet

15 feet

8.5 feet = half a giraffe

6 feet = baby giraffe
