

Piquing Peccary Interest

What is enrichment?

You learned about how the Calgary Zoo provides enrichment to its beloved residents in the Daily Dose at Home about camels and saw an example in the Daily Dose about peccaries. There are many things to consider, including the animals' strengths and natural behaviours in the wild.

What enrichment would you provide?

Some cool things about peccaries are they:

- have a super-strong sense of smell
- can use their snout to help them get food
- enjoy a good wallow
- can walk between spiny plants on small feet with 3 hind toes

Now it's time to try designing your own peccary enrichment item!
Sketch and label your idea below!
