

# Build a Bug Hotel

May 20th is **BEE DAY**

Bees are very important pollinators. About **1** in every **3** bites of food is thanks to bees. To say thanks to bees and other pollinators, try building a bee or bug hotel, or pollinator watering station. Share a picture of your bug hotel or pollinator watering station with us **#YYCZooSupportingYou**.

Bees need tubes closed at one end to make a home.

Pollinator water stations need somewhere for the insect to land and access the water
