

Fantastic Feet!

Ungulates are mammals with hooves, including horses, deer, pigs, rhinoceros, giraffes, and many more!

Each species has different shaped hooves adapted for their environment.

Each hoof makes a unique track pattern, which helps researchers identify animals that have been moving through a habitat.

Can you match each hoof, print, animal, and habitat for these iconic Canadian wildlife?

Bison

Caribou

Mountain Goat

Moose

Bighorn Sheep

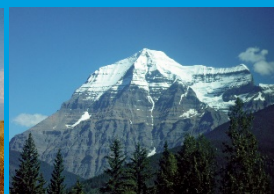

Tundra

Valley

Prairie

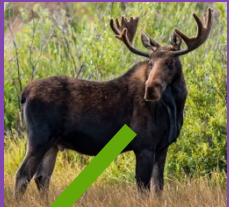

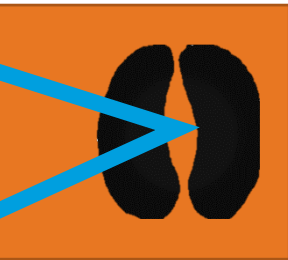

Mountain Slopes

Marsh

Fantastic Feet!
